ONE STEP AHEAD IN DEBT ADVISORY

## COMPANY OVERVIEW

Fineurop Soditic is an independent corporate finance firm established in 1998. It is focused on M&A and Debt Advisory. Headquartered in Milan, Fineurop Soditic has an extensive international network.

We stay one step ahead through continuous innovation in deal structuring, proprietary valuation methodologies, and tailored financing solutions for mid-market transactions.

Fineurop Soditic has successfully completed over 750 domestic and cross-border transactions with family owned businesses, large corporates and private equity firms. It has established a position as a leading player in the Italian market with a particular focus on mid-sized businesses.

In Debt Advisory, we pioneer financing structures beyond traditional banking: unitranche, private debt, mezzanine, and structured credit. We design bespoke debt solutions that optimize capital structure and unlock growth for mid-market companies.

Fineurop Soditic is an Associate Member of **AIFI** (Italian Venture Capital and Private Equity Association) and it is also member of the **World M&A Alliance** (international cooperation of independent M&A advisory firms, each having a strong track record in their home market).

**Eugenio Morpurgo**  
CEO and founding Partner

“ Since the creation within Fineurop Soditic of a fully dedicated department in the year 2000, the role of our independent debt advisor has become more and more important. It is not just a matter of finding the best conditions in terms of costs and structure but also participating with the borrower to a correct assessment of the risks and financial sustainability of the acquisition. In a M&A negotiated sale or auction our debt advisory practice gives buy side, an important competitive advantage, helping to reduce the “time to signing” and to get the deal done through a swift delivery. Beside M&A projects, we assist corporations in financial restructuring and refinancing, allowing them to meet their investment needs or to overcome transitional financial strains.

”
